- GraphQL
- Axios / Fetch
- State Management
- Supabase

## TOOLS

- GIT & GitHub
- VS Code
- Postman
- Figma (UI-to-code)

## CORE STRENGTHS

- Debugging
- Problem Solving
- Performance Optimization
- Code Refactoring

## PROFILE

Self-driven Frontend Developer with 3+ years of real production experience building fast, scalable, and clean user interfaces using Nuxt, Vue, and React. Strong in component architecture, API integrations (REST & GraphQL), performance optimization, and refactoring legacy codebases into maintainable systems.

I ship reliable features in fast-paced environments and solve problems through debugging, clear UI thinking, and clean engineering practices.

## WORK EXPERIENCE(3+YEARS)

### DeepSell (Augmented SCM Pvt Ltd)
*DEC 2022- DEC 2025*
Frontend Developer — Contract (Remote)

- Led the front-end development of core product features using Nuxt, Vue & React in a fast-moving AI-commerce startup.
- Built 20+ reusable components.
- Integrated multiple REST & GraphQL APIs, improving page load by 28%.
- Helped reduce API response failures by 40%

### DeepSell (Augmented SCM Pvt Ltd)
*JUN 2022 - NOV 2022*
Frontend Developer — Intern (Remote)

- Built core UI components used across production features.
- Integrating REST APIs and writing utility functions.
- Improved layout structures, responsiveness, and reusable styles.

### MarsDevs
Frontend Web Developer — Internship (Remote)
*MAY 2022 - JUL 2022*

- Converted Figma designs into responsive, production-quality Vue/Nuxt interfaces.
- Developed UI modules for multiple client projects and ensured cross-browser compatibility.

## FREELANCING PROJECTS

**Nishkalanka English School (Nuxt.js + Supabase)**
School Website (Full Stack Development)

**St. Teresa's School (Nuxt.js)**
School Website (Full Stack Development)

**Thapa Construction (Nuxt.js + Supabase)**
Construction Website (Full Stack Development)
